TRUCK BODIES THAT WORK AS HARD AS YOU DO

DRY FREIGHT VAN

LIGHTWEIGHT, TOUGH ALUMINUM VAN BODY

A fresh new approach to moving cargo

Our engineers took a fresh approach to designing a better dry van. All aluminum long-sills, cross-members, and side wall posts reduce total body weight while increasing strength. Built with tough, impact-resistant composite side walls and scuff plates instead of heavier plywood and steel. The interior is finished with two rows of E-track on the sidewalls, LED cargo lights, and a premium Whiting roll-up rear door to make a van body product that is lighter and stronger than our competition.

Body Shown Is:

18' Interior Length

92-3/4" Interior Width

91" Interior Height

Available in 16', 18', and 20' lengths (96"W x 91"H) .
